'Hearing Through the Eyes'

Helping to guide
you through developing
and expanding your vision
for your photo-media.

juliestephenson.net

Do you need feedback and extra guidance from a trusted person to help your images communicate more effectively and powerfully?

I offer my my mentoring programmes for a selected number of students via application, to develop and support the value you place on expressing yourself and your vision through your photography and photo-media.

Is your photography or photo-media practice important enough to you to invest in professional expertise and guidance?

If so, I offer my professional mentoring consultancy, to support and develop the value you place in expressing yourself and your vision through your photography.

Investing in equipment is considered mandatory and not given a second thought, but investing in valuable and necessary expertise and guidance offered by trusted and respected teachers and mentors is equally as important.

I dedicate myself wholeheartedly as a mentor; to listen, observe, discern and to offer suggestions and guidance.

Whether your photo-media is of the environment you are in, is staged or directed, or heavily manipulated or transformed; I am able to mentor you to help you to create images which communicate more effectively.

I specifically examine with you the visual elements of your images, and whether these elements support the theoretical basis for that image or your body of work.

I teach you to have the skills to objectively analyse an image, and how to learn to explore more deeply what you want to say, and specifically go through these skills with your own images and/or body of work.

I also cover areas which include your goals, studio/work environment, colour management, methodology, practices to help develop creativity and inspiration, composition in images, sources of inspiration, theoretical and conceptual background to your work, resources and reference material, developing a body of work to exhibit, presentation, and any questions you have regarding your photo-media.

Photography Mentoring

with
Julie Stephenson

For many of us, expressing our creativity is as important as breathing.

No matter what stage you are in your life or photo-media interest or career, there are times when a fresh way of seeing and connecting with the world is needed.

As your mentor I can assist you in seeing your work in a new way, and then helping you to develop it further.

When we listen with our eyes we are actually connecting with a deeper part of who we are.

When we become more attuned to our senses and emotions we develop greater awareness of not only our surroundings, but of ourselves. In doing this, we allow new ideas to develop, our creativity flourishes, and we have a clearer idea of what we want to say through our images. Our expression through these images which speak more clearly, not only stimulates inquiry and enriches our own understanding; but for others, has the potential to be a powerful catalyst for this as well.

"Hearing Through the Eyes" - Mentoring programme

Through this programme I offer exclusive, personalised, confidential, one-on-one feedback, tuition, discussion and guidance in relation to your photo-media practice.

Learning how to 'listen' to what your own images say is imperative if you want to be able to express your vision through them. All aspects of your photo-media practice will be considered in assisting you to create more powerful, expressive images.

Because I only mentor a small number of students, and application process is required.

Please contact me by email for application guidelines.

I draw upon my own life experience, my own gifts and talents, and my expertise in the field of photo-media to provide you with mentoring which will help you to develop your photo-media work and enable to to explore your expression through this medium in ways you would never have dreamed of.

About your mentor

I have been teaching since I was an adolescent, and have an ability to not only impart knowledge, but to nurture and guide others to find their own knowledge from within themselves. I have formally taught Physical Education, Swimming, Yoga and Meditation and have informally taught other interests I have learned myself, some of which are bodywork, hand-spinning, and papermaking using plant fibres. In 2005 I had my first photographic exhibition at the QCP in Brisbane and have exhibited regularly throughout Australia. My photographic practice includes prints, sculptures and artist books. I am continually exploring the expression of my connection with the world through my photographs, and recognise I have an ability to be able to help others do this as well.
